BELOW THE FOLD

NAME: _____

LESSON ONE

Memorable Learning Experiences

Interview a partner to uncover a perspective different from your own. Take notes and listen closely while they do the talking.

- Tell me a story about a time when you felt really excited about what you were learning in class?
- Why was it so exciting?
- What is your favorite part of school?
- When was the last time you had a lot of fun at school? What happened?
- When was the last time you had a bad day at school? What happened?
- Tell me about a time a teacher affected you positively.

NOTES

OUR CHALLENGE

Redesigning the Classroom Experience

What is a classroom?

Is it just a space where teachers and students spend most of their lives?

Your challenge is to redesign the learning experience, considering how it could better function to meet student and teacher needs and encourage new ways of thinking. How can we make learning and teaching easier for kids and adults? You will also follow a design process to create a solution. Your product will be original and meet a practical purpose.

Your solution may lean into these Levers for Change to transform your school.

At the end of our project, you will convince a group of peers and interested adults that your idea will make learning and teaching easier. You will present the problem you are aiming to solve, the solution you propose will solve it (a blueprint or prototype of your idea), and demonstrate how your innovation makes learning/teaching easier.
